GB Standard 15083-2006 for Automobile Seats

The GB Standard 15083-2006 defines the requirements for CCC certification of automobile seats needed for the Chinese market. This GB-Standard applies to M1 and N types of automobile seats and their anchorages as well as M2-3 type of automobile seats that are not in GB Standard 13057-2003 included.

Test requirements according to GB-Standard 15083-2006

The automobile seats shall meet test requirements such as:

- General requirements (e.g. fixing point)
- Strength test of the seat back and adjustment system
- Strength test of the seat anchorage, adjustment system, locking system and the replacement folding system
- Head restraint performance test (e.g. maximum backwards moving value)
- Determine the height of head restraint
- Determine the width of head restraint
- Determine head restraint clearance
- The endergonic test of the seat back and head restraint

Exemptions from GB Standard 15083-2006

There are some exemptions for seats that do not require CCC certification:

- Seats for vehicles of the type A and I of the classes M2 and M3.
- Seats mounted facing to the side or backwards.

Even if a product does not require CCC certification and does not fall under a GB-Standard, there is still a chance that problems with customs clearance may occur. In many cases, a CCC obligation is assumed to be necessary by customs for all automotive parts.

To avoid potential problems at customs for products that do not require CCC, we can offer to issue an investigation letter or an official letter of rejection by the CCAP (China Certification Centre for Automotive Products).

 ► MPR China Certification GmbH and China Certification Corporation will consult you regarding all GB Standards and support you during the complete certification process

- Straightforward, transparent management of the certification process
- All-inclusive consulting worldwide
- Regular updates and information regarding the certification progress
- Important contacts to all relevant Chinese certification authorities and test labs

Please do not hesitate to contact us for any questions
