GB Standard 15084-2013 for Rear View Mirrors

The GB Standard 15084-2013 regulates the requirements for CCC certification of rear view mirrors and other devices for indirect vision for vehicles of category M and N, and for vehicles of category L with less than four wheels. Furthermore, this standard determines the installation requirements of rear view mirrors.

Test requirements according to GB Standard 15084-2013

The rear view mirrors and other devices for indirect vision must pass all of the relevant tests:

- Impact test
- Bending test for holder mounted in the fixed position

Installation requirements according to GB Standard 15084-2013

The rear view mirrors and other devices for indirect vision must meet all installation criteria:

- Minimum number of compulsory mirrors
- Position
- Adjustment
- Requirements on field vision of view mirror
- Requirements on the field of vision measurement
- Devices for indirect vision other than mirrors

Exemptions from GB Standard 15084-2013

There are some exemptions for components of rear view mirrors and other devices for indirect vision that do not require a CCC-Certificate:

- Mirror frame
- Rear view camera

Even if a product or component does not require a CCC certificate and does not fall under the GB-Standard, there is still a chance that problems during the customs clearance may occur. In many cases, a CCC obligation is assumed to be necessary at customs for all automotive parts.

To avoid potential problems at customs for products that do not require CCC, we can offer to issue an investigation letter or an official letter of rejection by the CCAP (China Certification Centre for Automotive Products).

**MPR China Certification GmbH and China Certification Corporation** will consult you regarding all GB Standards and support you during the complete certification process:

- Straightforward, transparent handling of the certification process
- All-inclusive consulting worldwide
- Regular updates and information regarding the certification progress
- Important contacts to all relevant Chinese certification authorities and test labs

Please do not hesitate to contact us for any questions
